

DJ Business: Equipment Quick Start Guide
MobileDJProfits.com

Welcome to the Equipment Quick Start Guide! This is really simple: look through our suggested equipment setups, and then decide what you want. Remember that you can mix/match pieces. Maybe you want better speakers at first, but you can't afford to splurge on \$180 headphones, too. That's okay. It's your choice.

This is just a helpful guide for you to get started with your DJ equipment.

If you want to read more gear reviews, check out RockGearReviews.com for a bunch of real reviews of good and bad gear. And if you purchase some gear that you really love or hate, leave a review of it at RockGearReviews. You will be helping your fellow DJs by giving them the heads up!

Good luck!
